

Do you want to tell her it will have to wait 'til morning?

Unfortunately, children don't always get sick at convenient times, like when the pediatrician's office is open. And sometimes they just can't wait.

That's why there's Nightlight Pediatric Care at Bowie Health Center. We're open when your doctor's office is closed. Our special pediatric treatment rooms are staffed by board certified pediatricians.

We have an asthma room, an area just for sore throats, and a full service lab and x-ray department. And if your minor emergency or illness turns out to be more serious, you don't have to travel to an emergency department—Nightlight is inside the Bowie Health Center, the only free-standing emergency center in Maryland. We will even follow up with your doctor the next morning.
