Summit Software Changes Name To Summit IT Services

Cary, NC – Summit Software today announced its name change to Summit IT Services. Summit Software was established in 1986 as Solomon Consulting Services by President Lee Solomon.

Summit IT Services provides high-level information technology services in senior IT consulting, contingent workforce, contract-to-hire, permanent placement, project outsourcing, and executive training. “It was important to change our name to reflect our company’s growth and the full spectrum of services offered,” said Lee Solomon, president. “We began as a software development company, but over the last 15 years have grown into an IT solutions model company. We have expertise in analysis, design, development, requirements, quality assurance, and all other technical disciplines of software or network projects. We work with our clients to solve their IT problems whether technical or staffing.”

In addition to the name change, Summit IT Services also announced a change in the company’s website and e-mail addresses. The new website is www.SummitITServices.com. The company’s e-mail addresses now end with @SummitITServices.com.

For more information on Summit IT Services, please call 919-622-1547, or e-mail Eddie@SummitITServices.com.
